

Md Emon

Web Developer

📞 01601394910 ✉️ emonpmd671@gmail.com 🌐 <https://emon.me> 📍 Dhaka, Bangladesh

SUMMARY

I am Full Stack Developer experienced in building scalable web applications using PHP, Laravel, JavaScript, and React.js. Skilled in designing maintainable systems with modular architecture, RESTful APIs, and efficient database management, along with performance optimization using caching and queue management.

Experienced in developing e-commerce platforms, ERP/POS systems, and government digital services, with integrations such as payment gateways, SMS services, and analytics, focusing on secure, SEO-optimized, and user-centric solutions.

EXPERIENCE

Full-stack Developer (Laravel) CSE Tech - Daffodil International University

📅 2025 - 01/2026 📍 Dhaka, Bangladesh

Working as a CSE Tech (Full Stack Developer) on the E-Family Court platform.

SKILLS

Backend & Architecture:

PHP, Laravel, RESTful API Development, MVC Architecture, Repository Pattern, Modular Architecture, Queue Management.

Frontend & Performance:

JavaScript, React.js, Inertia.js, HTML5, CSS3, Responsive Design, Service Workers, SEO Optimization.

Database & Integrations:

MySQL, Redis Caching, Payment Gateway Integration (SSLCommerz), SMS Gateway Integration, Git, Custom Analytics, Role-Based Access Control (RBAC).

EDUCATION

Bachelor of Computer Science and Engineering

Daffodil International University

📅 2022 - 2026 📍 Dhaka, Bangladesh

Higher Secondary Certificate

Mahilara Degree College

📅 2020 - 2021 📍 Barishal, Bangladesh

Secondary School Certificate

Mahilara A,AN High School

📅 2018 - 2019 📍 Barishal, Bangladesh

CERTIFICATION

Full Stack Web Development with PHP, Laravel & Vue JS

Platform : [Ostad](#) 🌐 [Live Link](#)

ACHIEVEMENTS

Research paper : LMVIT -A Lightweight Hybrid MobileNet-Vision Transformer Model for Real-Time Lychee Leaf Disease Classification”

- Research paper accepted at IEEE QPAIN 2026, with potential publication in the IEEE Xplore Digital Library and Scopus indexing.
- Proposed a lightweight hybrid deep learning model for real-time plant disease classification.

PROJECTS

E-Family Court – National e-Judiciary Platform

🔗 <https://efamilycourt.judiciary.gov.bd>

- Contributed as a Full Stack Developer to the development of an end-to-end digital case filing system for the E-Family Court project implemented in Dhaka and Chattogram Courts.
- Built features enabling citizens to file cases online, track case progress, make secure payments, and receive SMS/email notifications.
- Developed modules for judges and lawyers, allowing judges to access case details, manage hearings, and issue orders, while lawyers can manage client cases and submit documents online.
- Implemented administrative tools for court staff to verify documents, process registrations, and generate operational reports.

Tech Stack Laravel , PHP , Microsoft SQL Server , JavaScript, AJAX, JWT, HTML, CSS , dompdf

E-commerce Site- TBZ

🔗 <https://tbz.com.bd/>

- Developed a scalable e-commerce platform using Laravel (backend) and React.js with Inertia.js (frontend) with a modular architecture and Repository Pattern for maintainability and scalability.
- Implemented MySQL database, Redis caching, and Laravel Queue Management to optimize performance and efficiently process background tasks.
- Integrated third-party services including SSLCommerz payment gateway for secure transactions and an SMS gateway for automated notifications.
- Built SEO-optimized architecture, implemented Service Workers for frontend optimization, and developed custom analytics for user activity tracking, with support for future AI chatbot integration.

eSchoolie Tuition Platform

🔗 <https://eschoolietuition.com>

- Developed an online tuition marketplace platform that connects parents and students with qualified tutors for home and online tutoring services.
- Implemented a multi-role system with dedicated panels for Admin, Tutor, Parent, Representative, and Merchant, enabling role-based access and management.
- Built features for tuition searching, tutor discovery, application management, and communication between parents and tutors.
- Developed administrative tools for platform management, tutor verification, tuition request handling, and operational monitoring to ensure smooth platform operations.

ERP-Based POS & Inventory Management System

🔗 <http://pos.syntorit.com>

- Developed an ERP-based Point of Sale (POS) and Inventory Management System to streamline retail operations, sales tracking, and stock management.
- Built modules for sales processing, product management, inventory tracking, and reporting, enabling businesses to monitor transactions and stock levels efficiently.
- Implemented role-based access control for administrators and staff to manage operations, users, and system configurations securely.
